## Presentación

Presentamos la primera lista de Aves para Costa Rica elaborada por la Unión de Ornitólogos de Costa Rica, la cual incluye un total de 894 especies de aves. Esto representa la mayor abundancia de aves para el país hasta el día de hoy. Esta lista incluye todos los registros históricos y actuales. Además esta lista es la tercera actualización de la lista de la Unión. Esta lista sigue la clasificación taxonómica sugeridos por la AOU, sin embargo nosotros reconocemos a *Colinus leucopogon* como una especie diferente de *C. cristatus*, basados en diferencias morfológicas y de canto.

Esta actualización se debe a la reciente observación de dos individuos de *Aythya americana* (Redhead) en Guanacaste, por parte de Jim Zook. Más información de ambas observaciones y fotos de las mismas se encuentran en la web de la Unión de Ornitólogos de Costa Rica (<http://uniondeornitologos.com/foro/4-general/223-aythya-americana-redhead.html>).

Elaboramos la lista en un formato de Lista de Registro o Check list, para facilitar su uso como una herramienta de registro de sus observaciones. El número en paréntesis a la par del nombre de la familia representa el total de especies de esa familia en Costa Rica. Esta es el resultado de las observaciones de muchas personas en el país, gracias a ellos es que esta lista crece. Por lo tanto si usted observa una especie de aves que no esté incluida en esta lista le agradecemos que nos haga llegar la información así como la evidencia de su registro (foto o grabación) para incluirla en la lista, a nuestro correo: [uniondeornitologoscr@gmail.com](mailto:uniondeornitologoscr@gmail.com). Esta lista se mantendrá en constante actualización, por lo que es bueno que estén revisando nuestra página web ([www.uniondeornitologos.org](http://www.uniondeornitologos.org)) periódicamente para enterarse de los cambios y actualizaciones.

<b>Familia/Family</b>	<b>Especie</b>	<b>English name</b>	<b>Registro/ Check</b>
